DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/14/2005 has been entered.

The preliminary amendment filed 12/16/2005 has been considered by the examiner. The examination on their merits is presented below.

Allowable Subject Matter

2. Claims 1-3, 5-25, 27-30, 32-33 are allowed.

Claims 1-3, 5-21, 27-30 are allowed as stated in the previous office action.

With respect to claim 22, the allowability resides in the overall structure of the device as recited in independent claim 22 and at least in part because claim 22 recites, "the passage hole configured to have at least one inclined surface".

The aforementioned limitations in combination with all remaining limitations of claim 22 are believed to render said claim 22 and all claims dependent therefrom (32) patentable over the art of record.

With respect to claim 23, the allowability resides in the overall structure of the device as recited in independent claim 23 and at least in part because claim 23 recites, "moving the first body to the second closed position where no portion of the bi-

directional latch extends within the main body", and "pressing only the first engagement protrusion of the bi-directional latch to move and latch a second engagement protrusion".

The aforementioned limitations in combination with all remaining limitations of claim 23 are believed to render said claim 23 and all claims dependent therefrom (33) patentable over the art of record.

With respect to claim 24, the allowability resides in the overall structure of the device as recited in independent claim 24 and at least in part because claim 24 recites, "wherein the passage hole has at least one inclined surface means".

The aforementioned limitations in combination with all remaining limitations of claim 24 are believed to render said claim 24 and all claims dependent therefrom (25) patentable over the art of record.
